NTD HCA- Honeycomb Attenuvents

Product Information

- Attenuvents allow air movement and equalisation of internal and external air pressure whilst maintaining the integrity of the shield.
- Attenuvents are available to be integrated with both NTD Shielding Systems and can be installed to most shield types retrospectively.
- Supplied as standard in sizes of 300mm x 300mm but larger sizes are available upon request.
- Can be used to facilitate air conditioning without compromising the shield performance.

Shielding Effectiveness	
Electric field	200KHz - 50MHz \geq 110dB
Flat wave	50MHz - 1GHz \geq 110dB
Microwave	1GHz - 10GHz \geq 100dB 10GHz - 18GHz \geq 100dB
