## EMC Penetration Panel

### Product Features

Standard sizes:

- 300mm x 300mm (clear opening).
- 300mm x 600mm (clear opening).
- 3mm Electro tin plated Steel plate.
- 6mm rigid steel back frame.

Can be retro fitted into most common types of shield.

More than 1 plate can be configured for each penetration to be changed depending on the test subject.

Our standard penetration panels provide shielding effectiveness equal to the performance of the main shield.

. All panels are easily removable and can be configured to your individual requirements by drilling & punching to suit coaxial connectors, pipe penetrations and fibre optic waveguides.
